

# Multifaceted Education for Creating Awareness on Engineering Careers

## Summer Workshop for Middle and High School Girls

This workshop aims to stimulate the interest of middle and high school girls in engineering by creating a multifaceted curriculum that encourages them to pursue a career in Science, Technology, Engineering and Math (STEM). This curriculum exposes students to different engineering and technology disciplines and motivates them to undertake a career in STEM.

**When: June, 2022 (exact dates TBD)**

**Where: Virtual and/or In-person (TBD)**

*Dr. Sravani Vadlamani*  
Assistant Professor
